**Subject:** Upcoming week tasks

This week I would like START to perform the following tasks in addition to rad item removal

1. Split 9W into 3 sections N-S and sample for PCB only. Collect samples for ERRS to run RCRA metals
- 2 Post-ex sample in front of Pile 2 for PCBs & total metals. No RCRA
- 3 Mark off west side of 9W to distinguish between 9W and 10
- 4 Resample Area 10 as we discussed. (corners separate from center)

Let me know if you have any questions. I found the second cap, it fell into a slot in my truck

Thank you  
Chris
